

## ESTIMATED COSTINGS AND PROJECTED SALES

How many products do you plan to make?

### How much will it cost?

DESCRIPTION	AMOUNT €
Total Production Costs	

List here any other costs involved in the business  
(This could include advertising and promotion costs, equipment rental etc.)

[illegible]

Production Costs	€
Expenses	€
Total Costs	€

SOURCE	AMOUNT €
Total	

Now work out the cost of making each product - the unit cost €

The unit cost is total cost divided by the number of products you make.

What is your selling price? €

This is the price you will sell the product at, to make a profit.

What is your total income? €

This is the selling price multiplied by the number of products you plan to sell.

How much profit will you make?

Your profit is your total income minus your costs.
